Executive Summary

B.E. Electronics and Communication Engineering student with hands-on experience in software development gained through academic projects and an engineering internship. Skilled in developing web applications and AI-powered solutions using C, Python, Java, React.js, TypeScript, MySQL, and Supabase. Strong problem-solving, teamwork, and continuous learning abilities, eager to contribute effectively to software development and technology roles.

Technical Skills

- Programming Languages: C, Python, Java
- Web Technologies: React.js, TypeScript
- Databases: MySQL, Supabase
- Tools & Software: GitHub, Visual Studio Code, Lovable AI
- Operating Systems: Linux, Windows

Soft Skills

- Communication & Teamwork
- Problem Solving
- Time Management
- Adaptability
- Quick Learning
- Languages: Tamil (Native), English (Professional Working Proficiency)

Professional Experience

SK Electric Motors, Erode

June 2026

Role: Engineering Intern

Responsibilities:

- Assisted in understanding manufacturing and assembly processes of electric motors.
- Observed production workflows and quality control procedures.
- Learned operation and maintenance of electrical machines.
- Worked with engineers on industrial safety practices.
- Enhanced teamwork and communication through industrial collaboration.

Impact:

- Completed a one-month industrial internship successfully.
- Strengthened practical understanding of industrial operations and safety procedures.

HealthGuard: Smart Telemedicine and Rural Healthcare Management System

2026 – Present

Role: Project Developer

Responsibilities:

- Developed a telemedicine and rural healthcare management system.
- Designed user interfaces for patients and providers.
- Integrated Supabase for secure data management.
- Implemented appointment booking, symptom tracking, emergency support, and health records.
- Collaborated on system design, testing, and feature enhancement.

Impact:

- Delivered an end-to-end academic healthcare solution.
- Integrated multiple healthcare management features into a unified platform.

Sentinel AI: AI-Powered Industrial Safety Intelligence for Zero-Harm Operations

July 2026 – Present

Role: AI Project Developer

Responsibilities:

- Developed an AI-powered industrial safety platform.
- Designed a real-time monitoring dashboard.

- Implemented AI-based compound risk detection.
- Built an AI Safety Copilot using RAG.
- Integrated IoT, CCTV, and SCADA simulation.
- Developed emergency response and compliance features.
- Collaborated on design, testing, and enhancements.

Impact:

- Developed an integrated prototype for industrial safety monitoring.
- Combined AI and simulated industrial data sources into a unified solution.

Education

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

V.S.B. Engineering College (Autonomous), Karur

Expected Graduation: 2029 | CGPA: 8.04/10

Awards & Accomplishments

- Industrial Internship – SK Electric Motors, Erode (June 2026)
- Elite NPTEL Certification – The Joy of Computing using Python (IIT Madras)
- Python Foundation Certification – Infosys Springboard
- TCS iON Career Edge – Young Professional
- Cisco Networking Academy – Introduction to Internet of Things (IoT)
- Cisco Networking Academy – Linux Unhatched
- Great Learning – C for Beginners
- Semi-Finalist – ET AI Hackathon 2026
